## Non-intrusive program

Browse Reporter is very small program that runs in the background as a Service. It quietly records every site that has been accessed without the users' knowledge. However, if you wish to notify your users that their systems are being monitored, then a customizable message can be displayed at startup.

## Additional Information

- Export URLs to Browse Control which means Browse Reporter delivers control of what employees see and when.
- Remote Screen Capture
- Provided as a managed service so no worries about updating, managing, renewals etc.
- Operating cost rather than capital cost so tax deductible
- Priced on a per user per month basis so completely flexible to suit your requirements
